

Omegapoint makes a strategic investment in Cyber Security

Omegapoint takes another important step in the journey to becoming a market-leading actor in Secure Digital Transformation. The company makes an advance in the Cyber Security area and accelerates development by investing in the company Cyber Aggregate AB.

The founders of the company are the Cyber Security-profiles Nils-Olof Ekelöw and Björn Weigel. Cyber Aggregate will be a majority owned subsidiary in Omegapoint's Group and changes its name to Omegapoint Cyber Security AB as a step of the investment. Nils-Olof Ekelöw will be the CEO of the company and Björn Weigel will be the Chairman of the Board.

The market for services in Cyber Security is in constant development and is growing quickly. Through this investment Omegapoint strengthens its strategic competence to protect its clients from Economic Cyber Espionage, Cyber Warfare and Cyber Crime.

"-This investment complements our current service offering and enables Omegapoint to offer our clients a total and unique range of services in Secure Digital Transformation unlike the other actors in the market. I am quite happy and very much looking forward to continuing this journey together with Nils-Olof and Björn", says Johan Malmliiden, CEO at Omegapoint Group AB.

Nils-Olof has a background as founder and CEO of the company Ekelöw Info Security, which was awarded "Security company of the year" at the Security Awards in 2014. Björn is a strategy consultant who has invested in and worked with several growth companies. He is the author of "The Innovation Illusion" which was listed as Best Business Books 2016 by Financial Times, he has also written "The Down side of Digitalisation".

"-We know that the demand of Cyber Security services is strong and we have ambition to grow quickly. Omegapoint has worked with security for the last 20 years and has thorough experience in most business areas which makes them an ideal partner for us," says Nils-Olof Ekelöw, founder of Cyber Aggregate AB and CEO of Omegapoint Cyber Security AB.
